RE: Engineering Program Analyst- Program Management (Job Number: TOR05995)

Dear Hiring Manager:

I am writing to express my interest in the Engineering Program Analyst position posted on LinkedIn. After carefully reviewing the job posting, I am confident that as a candidate with several years of process and quality engineering experience in highly regulated industries ranging from aerospace, medical devices, and automotive, where I have successfully managed progressively complex systems, I will be a great fit for this role.

I currently lead all aspects of the process and quality engineering for a company operating in a highly regulated medical devices industry, including engaging with external stakeholders, and championing continuous improvement actions and organizational change. I played a pivotal role in the transfer of research technologies into manufacturing including developing processes from the ground up and implementing cGMPs and driving engineering changes by engaging in negotiations with over 100+ personnel and suppliers. With This experience combined with my ability to quickly adapt and grasp new concepts; I am confident that I will be an excellent fit for the role.

This opportunity to join your family significantly interests me because my experience and education perfectly align with the opportunity, and I am confident I will be able to make meaningful contributions to the organization. I have also collaborated with Bombardier in the past especially during my graduate studies. My education, experience in highly regulated industries and peer-recognized certifications in the domain of quality, project management and continuous improvement are a testament that I can competently execute the role's responsibilities. I am also currently pursuing PMP certification.

Throughout my career, I have demonstrated the highest levels of service and commitment to the mission of any organization I have worked for. I'd be delighted if you'd give me a chance to discuss how I might add value to Bombardier.

Thank you for your time and consideration. Looking forward to discussing how I might be fit and contribute to the company!

Yours sincerely,
Arun Baby
